Blockchain Use Cases

Friends,

We wish you a Happy New year 2022, the year of Web 3.0, Blockchain, the year of digital breakthrough. In 2022 will gift a plethora of newer Technologies as Metaverses, NFTs, 5G, IoT, Blockchain. We will be more and more dependent on technology in our day-to-day lives. We will be on the cusp of this technological evolution, and this transformation for sure will benefit humanity. Despite all odds, we had the great year 2021; we also evolved stronger and more resilient.

In our endeavour on Technology for All, we are starting with our weekly newsletter BlockIT focused on emerging technology use cases. We welcome you to contribute your technology stories.

Best Regards

Team TRST01

The Tech Talk

Technology fuels your imagination helps you in your next level of innovation. It is just the way we adapt it to make use of it.

Whether Technology Evolution is fueling Human Evolution or Vice versa? It seems both of the statements are correct. Technology fuels your imagination helps you in your next level of innovation. It is just the way we adapt it to make use of it.

Myths About Blockchain You Must Not Believe!

Blockchain technology was born in 2008, in the wake of a Wall Street crash. Transformational technology was the invention of the shadowy “Satoshi Nakamoto”. And now, in just over a decade, anyone you meet in banking, investments, cryptocurrency, and other areas, talks about blockchain.

The first implementation of blockchain technology was in the form of Bitcoin.
